

Dear Mr. Donald Trump

Hi!

Mr. Trump, My parents always tell me that God is one and he have created this beautiful world full of different species some are humans some are plants, some are animals, some are Reptiles or Marine fishes. But I never heard them saying that humans are also divided in different categories for having different colour of skin or speaking different languages or having different way of remembering God. If God wanted to divide us according to areas or cultures or back ground; why not, he have given us different shapes like some having tails or some having two horns or some walks on four legs and some having stripes on body. If we all are born with same structure having same skeleton inside our body that means God made us one type of specy that is Humans.

All human babies are born without knowing their caste, culture and are brought up some way & after Death same skeleton comes out of our body

Then why some Big people divide us into different cultures.

I'm sure all the children of my age don't want to be divided. I have many friends from different cultures. I'm so proud of them and they are of me.

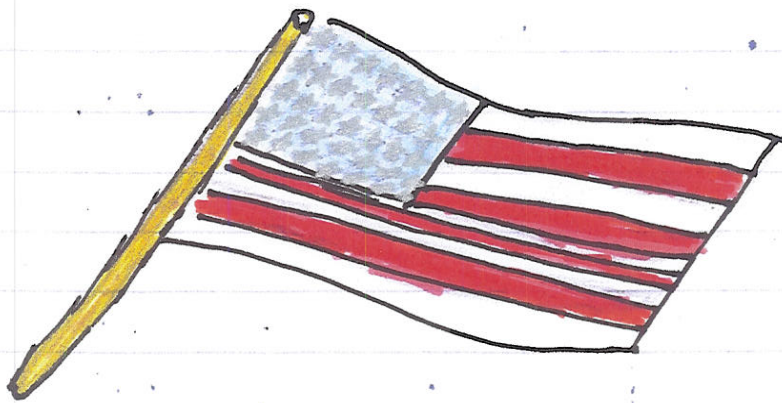

If Sun don't divide its rays and Sea don't

divide water then why humans divide humans

Mr President trump can I request you to make
a safe and happy place, a happy world for
everyone full of love and peace.

please help me to make my dream come true
